Kindergarten Unit 2 worksheet: Comparing two numbers to 10 (answer key)

ANSWERS AT A GLANCE

1. Circle 8, 9 and 7.
2. Circle 2, 4 and 1.
3. No. There are 8 keys, and 6 is less than 8.
4. No. 10 is greater than 4.

WORKED SOLUTIONS

1. Circle the greater number in each box.

ANSWER

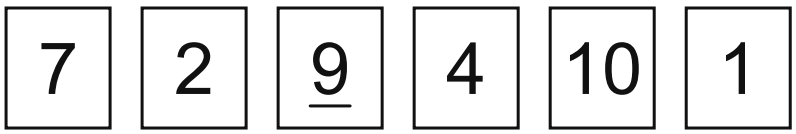

Circle 8, 9 and 7.

SOLUTION

Say the counting words from one. Eight comes after four, so 8 is greater than 4.

Nine comes after five, so 9 is greater than 5. Seven comes right after six, so 7 is greater than 6.

2. Circle each number that is less than 5.

ANSWER

Circle 2, 4 and 1.

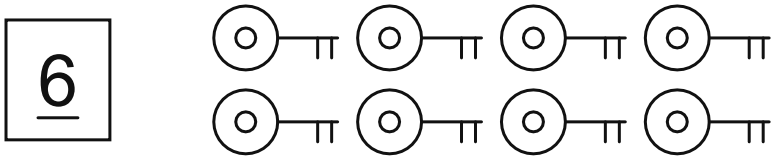

SOLUTION

Count from one: one, two, three, four, five. The numbers said before five are less than 5.

On the cards, 2, 4 and 1 come before five. 7, 9 and 10 come after five, so they are greater.

3. Is 6 more than the keys? Circle yes or no.

yes no

ANSWER

No. There are 8 keys, and 6 is less than 8.

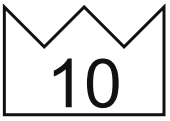

SOLUTION

Count the keys, touching each one: the last word is eight, so there are 8 keys.

The card says 6. Six comes before eight, so 6 is less than 8. Six is not more than the keys.

4. Owen says 4 is greater than 10. Is he right?
Circle yes or no.

yes no

ANSWER

No. 10 is greater than 4.

SOLUTION

The 1 in 10 looks small, but 10 is one number, ten.

Count from one: four comes long before ten. So 4 is less than 10, and 10 is greater than 4. Owen is not right.
